HOW TO USE SIGNWRITER DOS ON WINDOWS XP
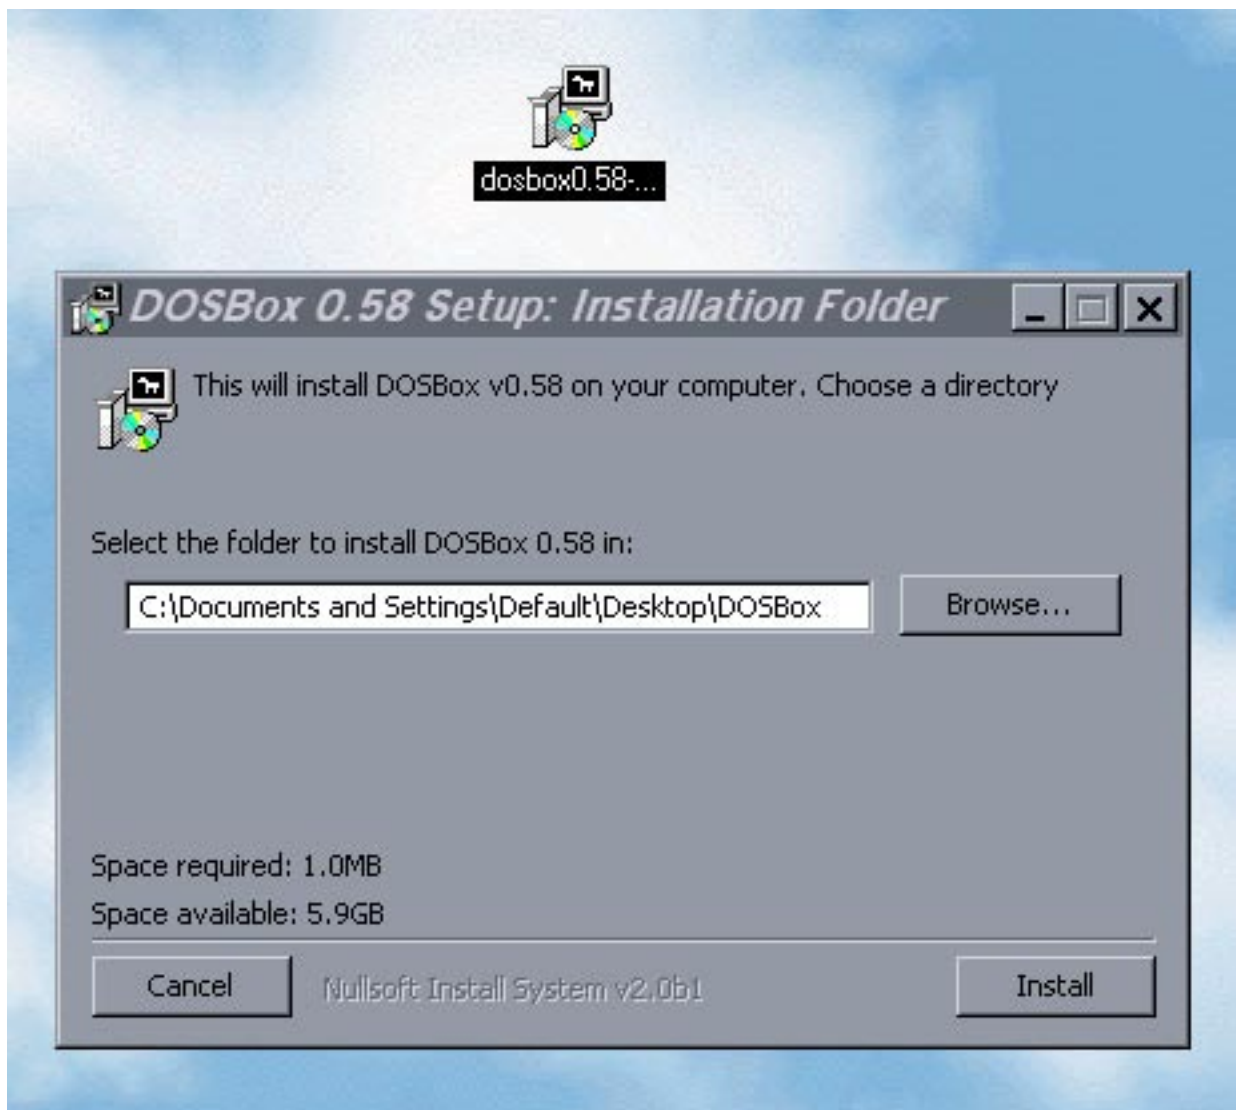

1. DOWNLOAD a free program called "DOSBox"... Go to this web page to download:

http://prdownloads.sourceforge.net/dosbox/dosbox0.58-win32-installer.exe?download

2. DE-COMPRESS the DOBox program, placing the DOSBox folder on your desktop:

3. You now have a folder called DOSBox on your desktop:

4. Find the SIGNWRITER DOS folder. It must be named "sw". Place it on your desktop:

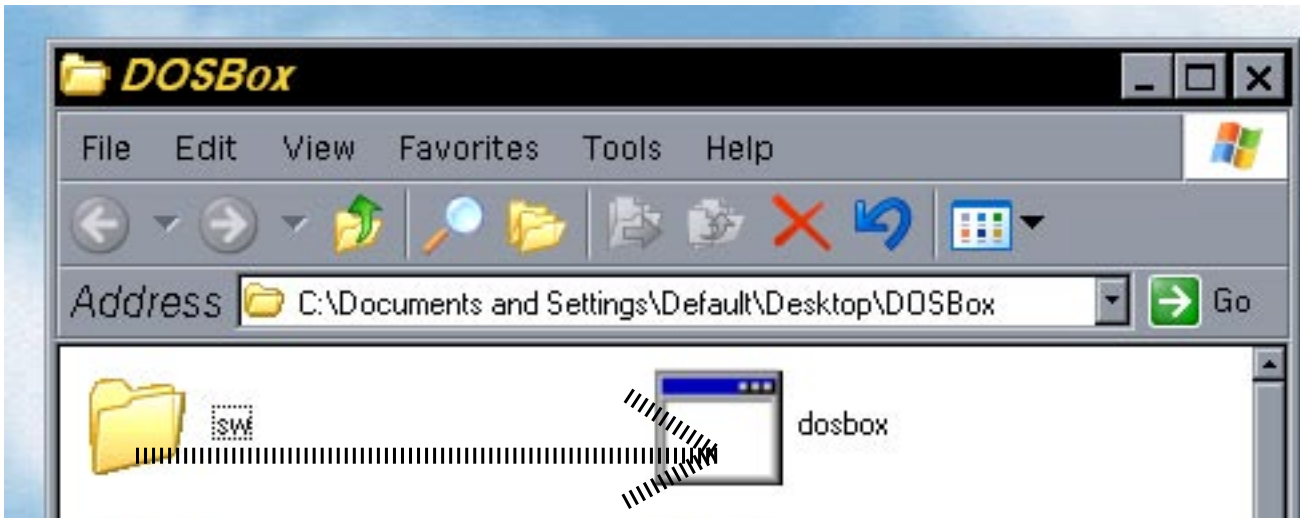

5. DRAG the sw folder ON TOP of the DOSBox folder. This will place the sw folder inside the DOSBox folder:

6. Open the DOSBox folder. You should see the sw folder there...

7. DRAG THE SW FOLDER on top of the icon for DOSBox:

8. DOSBox will open...

```
0.58
DOSBox Shell v0.58
DOSBox does not run protected mode games!
For supported shell commands type: HELP
For a short introduction type: INTRO

For more information read the README file in DOSBox direc

HAVE FUN!

11. ONLY one file will be visible in the File Box. In the above diagram, only the file "deaf1" is listed. But actually there are a lot more files available....Unfortunately, DOSBox can only list one at a time...So how can you see the other files that are available?...

12. To see all the files available, use Windows Explorer to see a listing of all the files in the sw folder.

13. Then use the Open Command, in SignWriter, to open those files.
